DETAILED ACTION

Response to Amendment

1. Applicant's amendments and accompanying remarks filed 11/17/03 have been entered and carefully considered. Applicant's amendment is not found to patently distinguish the claims over the prior art and Applicant's arguments are not found persuasive of patentability for reasons set forth herein below.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hansen et al (5998032) in view of Murji et al (5387385), as set forth in the previous action.

Applicant argues that Murji's compacting process actually results in a decreased average density. However, the instant rejection does not rely on Murji's compacting process. Hansen teaches a compaction process, but fails to specify a final density. Murji merely teaches that applicant's claimed density results in superior properties (col. 1, lines 64-67). Therefore, applicant's argument is not commensurate in scope with the rejection.

Applicant argues that Murji fails to teach hydrogen bonding between the fibers. However, it is the examiner position that the compacted fibers of Hansen inherently have hydrogen bonds, because Hansen utilizes the same compacted fibers as the

Art Unit: 1771

instant invention. The examiner notes that this argument only applies to claim 15 because the other claims do not specify hydrogen bonding between fibers.

Applicant argues that Murji fails to teach a compression factor of at least about 45. However, in order to compress the fabric of Hansen to the density taught by Murji, a compression factor of 45 would be inherently necessary.

Conclusion

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Examiner Pratt whose telephone number is 571-232-1480. The examiner can normally be reached on Mon-Friday from 9 to 5.
